

ISO 9001:2015 – Fundamentals and application in quality management

The training provides in-depth knowledge of ISO 9001:2015 – the globally recognized standard for quality management systems. Participants learn the key requirements and, using practical examples, learn how to efficiently implement quality objectives and documentation requirements in everyday business operations.

Training objectives

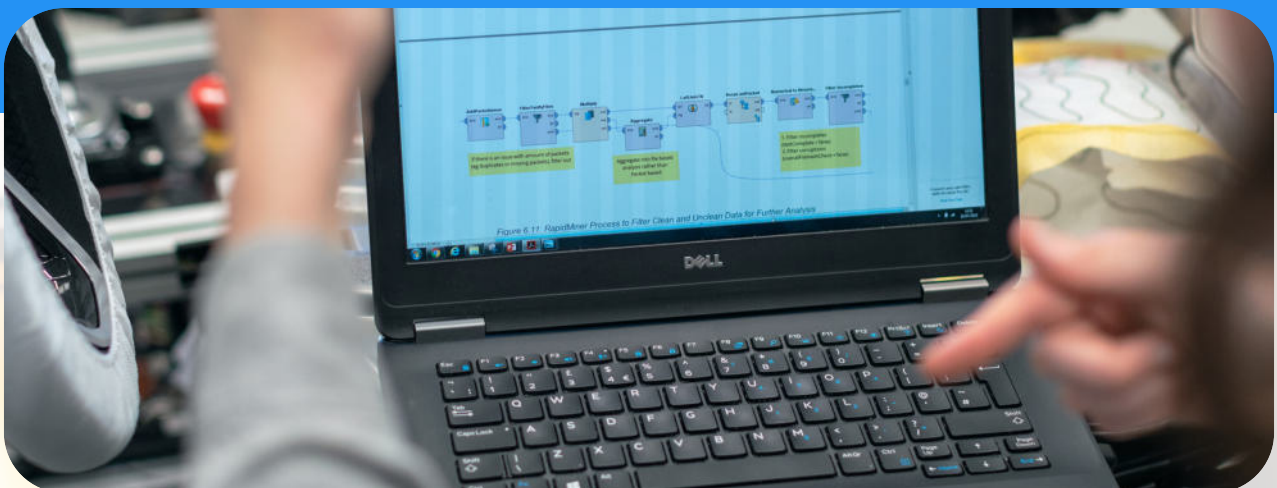

- Understanding the structure and content of ISO 9001:2015
- Overview of principles, key terms and requirements
- Competence in planning quality objectives, handling nonconforming outputs and corrective actions, as well as dealing with audits, documentation and continual improvement
- Ability to interpret standard requirements in your own company context
- Application of acquired knowledge through practical examples and a knowledge test to verify learning success

Target group

- Employees involved in the implementation or further development of a quality management system
- Professionals working in quality planning or as part of the quality management team
- Managers with process or quality responsibility
- Internal auditors with a focus on quality management
- Quality Management Representatives (QMRs)

Content

- Fundamentals of quality management
- Context of the organization and interested parties
- Leadership and commitment
- Risks and opportunities in quality management
- Requirements for planning and operation
- Internal audit, management review, and continual improvement
- Practical examples and a knowledge test to support long-term learning success
